- Single invoice collection
- Supplier Reconciliations
- Credit Checks
- Trace

our approach

Credit Control Management Services is an outsourcing company that takes the emotion out of chasing debt and offers a bespoke solution to ensuring, politely, that you are paid on time. We can either work with your own system or introduce another for you to adopt.

We'll start with a review of your needs and explore what systems and measures you already have in place. From this, we can detail a plan of action that aligns directly with an order of priority to secure your financial position. On completion of single activity (debt collection or customer reconciliation) we will provide a detailed invoice and carefully handover activity details necessary.

If we are working to support you on a monthly basis, we will plan an agreed schedule of works and priorities which will be routinely assessed for productivity.

our customers

I was having a difficult time with a client not paying a fairly large outstanding invoice that had been going on for several weeks, this was causing me untold amount of stress and limited my cashflow immensely. Within two weeks of Craig getting involved the invoice was paid for providing a professional, efficient and invaluable service.

CCMS were attentive and gave a quick, honest assessment of our outstanding debts. This resulted in a return of debt that we'd written off some time ago.

Very knowledgeable and professional and our customer paid within 24 hours, where I was not able to get arrangement for nearly 12 months due to a change of address. We are very pleased with his service and can recommend without a shadow of a doubt.

checklist for success

Which of these is a concern?

- Solvency of new and existing customers
- Monthly credit limit reviews
- Updated terms and condition of service

- Contracts updated and signed
- Multiple access to contacts like accounts, purchasing, directors.
- Quality administration from PO received, to Sales invoicing to proof of
- POD and service delivery to ensure you can get paid.
- Close and regular contact with that customer or client
- Disruption to your existing credit control team (maternity leave, illness etc).
- Prepare for the unexpected in both your critical chain analysis and sub level impacts
